SATA multi clean 2

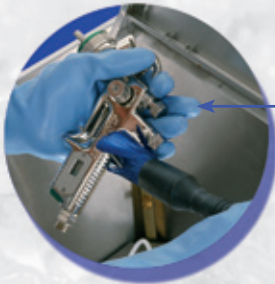

High performance spray gun washing machine with integrated exhaust

In order to reduce solvent emissions, authorities tend to impose more and more closed cleaning systems for paint spray guns. With washing machines like SATA multi clean 2, bodyshops save money and help to protect the environment, due to low solvent consumption:

- Suitable for hand held spray guns
- Thorough cleaning of all material-conveying parts of the gun (no dismantling required)
- Two separate containers hold washing resp. rinsing liquids
- Trolley for fluid containers included, for easy refilling and changing the cleaning agent
- Only 0.1 l fresh cleaning agent required for the automatic washing process
- Replaceable filter mat inside the washing chamber absorbs coarse residue before liquid is returned to the cleaning fluid containers

The new SATA multi clean 2 features helpful functions:

- High performance, sturdy double diaphragm pump, low wear
- Special brush soaked in cleaning fluid, for manual pre-cleaning of spray gun and cup

Cleaning brush for manual pre-cleaning, directly above the washing chamber with exhaust.

Foot pedal to control cleaning agent flow into the brush.

Technical Data:

L x W x D: 660 x 1000 x 380 mm
Cleaning agent consumption: approx. 0.1 l per washing process
Air consumption: approx. 90 NI/min at 5 - 6 bars
Cleaning agent container contents: 15 l each

Order # 38 257

Accessories

Flexible aluminum pipe, 6 m long, with 2 clamps, for exhaust air.

Order # 26 815

Pressure regulator, complete, for SATA spray gun washing machine, including pressure gauge 0 - 10 bars.

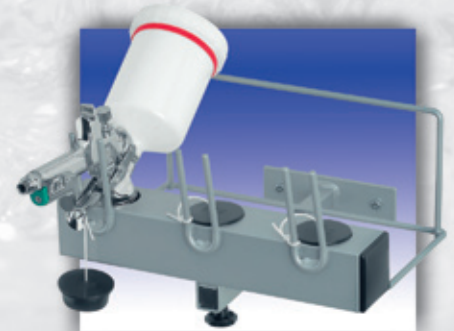

Order # 21 188

SATA clean

Wet Holding Tray for Paint Spray Guns

- Perfect for taking spray guns during breaks
- Prevents hardening of paint residue inside the nozzles
- Closing caps minimize cleaning fluid evaporation
- Easy refill and cleaning due to removable tray
- Can be fixed anywhere
